100TBB Student Bass Trombone

Elkhart by Conn Selmer Europe 100TBB Student Bass Trombone - Bb/F/Eb - Bb/F/D/Gb, double plug outfit, yellow brass in a clear lacquer finish with a backpack-style case.

Features

The build quality and price of the 100TBB make it a popular bass trombone with schools, music education services, and brass bands because it has been designed to suit entry-level players specifically. Crafted from traditional yellow brass, in a clear lacquer finish, it features an 8" bell which affords excellent projection due to the correct amount of air resistance for the player's ability, while reaching a lower register. The professional 'double trigger' design and compact wrap allow the performer to achieve super low notes effortlessly. It's easy playability and accurate intonation make it an ideal bass trombone for beginners, as it produces a full sound and is not challenging to play.

What is more, its slide has been carefully lapped to ensure smooth action and is made from durable cupronickel. This reliable hard alloy prevents corrosion and will prolong the instrument's life even further. This is particularly important on the slide where any damage can restrict its playability.
