NEW

C190SL229X

Professional Trumpet

SCAN FOR MORE INFO

Overview

- The all-new C190SL229X is one of five models in the new Bach C190 Series, built to meet the technical demands of today's players while delivering Bach's signature rich, resonant tone.
- Drawing inspiration from early Elkhart model C trumpets (1965–1980), which set the standard for orchestral players, the C190SL229X offers similar playing characteristics but with improved intonation and a fuller sound profile.

Sound Profile

- Features the Bach "X" bore main tuning slide, with a .462" top leg and crook and a .459" lower leg, providing a brilliant, broad sound with lightning-fast response.
- The C190SL229X delivers a big orchestral sound with quicker response and greater ring, the result of a wide wrap and wide Z-brace construction paired with a lighter Mt. Vernon-weight #229 bell.
- The "X" style main tuning slide, with a .459" medium-large bore lower leg, provides more focus and efficiency in the response.

Design Details

- 25H Leadpipe
- Two-Piece Valve Casings
- .462" Large Bore
- Mt. Vernon Weight 229 Bell
- Rounded Stainless-Steel Wire, Side Seam Bell
- Wide Span Z Braces
