

EVOLUTION SERIES

THE SOUND ESSENTIALS

Introducing a new, fresh look for the Evolution series drums. Engineered by Ludwig's USA design team, the Evolution series bridges a century-plus of drum-making expertise with the modern demands of today's aspiring players. This package is designed for intermediate drummers to excel and develop their voice behind the kit. Whether you're moving up from a beginner kit or returning to the drums with renewed passion, Evolution delivers advanced performance without the premium price tag.

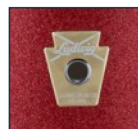

The Evolution series features 6-ply poplar shells that offer warmth, articulation, and a reliable tuning range for all styles of music. It comes complete with double-braced hardware, and Remo UT-Pinstripe heads.

This next era of Evolution series drums feature large Keystone badges, script logo heads, and four new stand-out finishes: Prosecco Sparkle, Crimson Sparkle, Caramel Sparkle, and Atlantis Sparkle.
